

TRITEK - LEGAL CASE MANAGEMENT APPLICATION

Background

Tritek is a **Legal Case Management Application**. It is primarily used for tracking client information and other legal evidence such as documents, images, audio and video files according to the case.

Key Challenges

- ✓ Very slow system
- ✓ Lesser user-friendly
- ✓ Slow in executing multiple queried reports
- ✓ Not able to execute large reports on time
- ✓ Maintenance difficulty

Our Solution

Migrated the software application to VB. Net using SQL server as backend

- ☐ .Net based application
- ☐ Database and application is separate layers
- ☐ More secured system
- ☐ Able to handle complex queries
- ☐ Able to manage multiple reports at the same time
- ☐ Multiple user facility available
- ☐ Improved and easy for users with extensive user-friendly screens and layout

Results

- ✓ Application layer and database layers were separated
- ✓ Multiple reports can be generated at single instance
- ✓ Fast and quick access to the system
- ✓ Improved user friendly screens and layout
- ✓ Multiple users are able to access at a single time

Technologies Involved

- DOT NET
- SQL server
- Infragistics
